MAKE THE RIGHT CHOICE

## NOVEL VEHICLE MANAGEMENT SYSTEM (NVMS)

Prepared by TECHFRAMEZ

KEY FEATURES

1-FLEET INVENTORY TRACKING

All editions of novel Fleet management system will track an unlimited number of fleet vehicles and equipment. You can track all of the descriptive details that you need to manage your fleet, including the year, make, model, serial number, and all of the information that is critical to your business. You even have user-definable fields for tracking additional equipment facts that are important to you. You don't have to be - or hire - a computer programmer to tailor Novel Fleet management system to meet your needs.

2-PREVENTATIVE MAINTENANCE:

Novel Fleet Management System Makes It Easy To See When An Automobile, Truck, Or Other Piece Of Equipment Is Due For Service. Automated And Color-Coded Preventive Maintenance (pm) Alerts Will Automatically Display Each Time You Start The Program. Equipment Due (or Overdue) For Service Will Be Shaded "red," While Equipment Soon Due For Service Will Be Shaded "yellow". You'll Know Immediately Where Your Fleet Stands At Any Given Time. Novel Fleet Management System Provides A Wide Range Of Pm Services That Are Already Defined For You. However, You Can Easily Customize The List Or Create Your Own Maintenance Schedules Based On The Tracking Requirements Of Your Fleet. You Can Track Your Pm By Date, Mileage, Hours, Or Kilometers

3- REPAIR MAINTENANCE:

Tracking repair maintenance is just as important as tracking preventive maintenance. Keeping track and monitoring trends in repair maintenance can help you decide whether to keep or retire a vehicle or piece of equipment. With novel fleet management system, your maintenance and repair records are captured automatically. In addition to pm scheduling, the software logs and can schedule repairs for unexpected problems that drivers encounter.

4- HISTORY RECORDING:

Tracking history is one of the most vital tasks when managing a fleet. Good records can be used to analyze costs, and monitor trends in wear, neglect and abuse of your equipment. And historical information can be the determining factor when you decide to keep or retire a vehicle or piece of equipment. When you perform maintenance activities on your fleet, novel fleet management system keeps track of all of the important details. The software generates a preventive and repair maintenance history that lists all of the maintenance performed on your equipment. This report includes the costs of preventative maintenance, repairs, parts, labor, and more. In addition, novel fleet management system provides a wealth of history reports that can be used to analyze your history data over time, to establish the equipment's cost effectiveness to your company.

5-FUEL TRACKING

Monitoring fuel consumption and economy is also an important part of your job. When novel fleet management system records fuel transactions, the software performs numerous fuel statistics calculations that show you trends in wear and abuse of your equipment. The software also provides a fuel import utility which will completely eliminate manual data entry as it imports data from your existing fuel card system.

You can also customize this maintenance tracking software to track the types of information that are important to you, and print detailed reports that tell you where you stand at any given time.

6-PARTS INVENTORY

Easily track the usage of parts on your fleet with the Deluxe Edition of NOVEL FLEET MANAGEMENT SYSTEM. You can itemize parts used when recording any maintenance performed, and generate parts usage reports.

If you also need stock tracking capabilities, the Shop Edition will provide you a complete set of parts inventory features, including stock management, part associations, reorder notifications, and a built-in purchase order system.

7- WORK ORDERS (SHOP EDITION ONLY):

In addition to reporting any maintenance that is due, the work order system will automatically generate work orders for each piece of equipment based on this due maintenance. If you've configured the software to do so, the parts required to perform the maintenance will also be automatically included on the work order.

8- FLEXIBLE REPORTING:

We know how important reports are to your fleet maintenance management work. Unfortunately, most software companies take this lightly and include inadequate reporting modules in their software. This is where novel Fleet management system excels. We give you more than reports at your fingertips. From simple fleet listing reports to detailed periodical cost analysis reports, everything you need is included. There is also a report editor tool that lets you easily make adjustments to any of the stock reports included with novel Fleet management system.
