ABOUT eOCTOPUS

eOctopus is the enterprise class software provided by Novel Cloud Systems Ltd. Novel Cloud services are designed to provide easy, scalable access to applications, resources and services, and are fully managed by our skillful team. Novel cloud service can dynamically scale to meet the needs of its users, and because we Monitor our services 24/7, there's no need for a company to provision or deploy its own resources or allocate IT staff to manage the service. The Services and solutions at Novel Cloud Systems Ltd. are as limitless as the boundaries of engineering, science and technology. We're growing all the time and wherever we go and whatever we do, our Customers grow with us. We give talented, open-minded and innovative and skilled team the chance to explore varied enterprise solutions in a challenging and rewarding international environment as a British company. We understand and just how rare truly exceptional customers are, so we'll invest the same innovation, time and care into your business that we put into each of our fascinating solutions.

eOctopus POS System

eOctopus POS System is the most versatile solution in the market today a feature-rich POS platform that offers business owners and operators complete control of their business. Whether you need a Quick Service POS, Restaurant POS, or Retail POS, eOctopus POS System offers unmatched features and integrations designed to help grow your revenue and your business. With best-in-class security, Revel offers the tools you need and the partnership integrations you want to run the business you want, as you see fit.

eOctopus Works on multiple hardware architecture, whether its PC, Cash register or IOS, Android tablet. Turn tables faster and expedite orders with the eOctopus iPad/Android POS System using ingredient level inventory, table timers, table layouts and more.

Enhance the shopping experience with the eOctopus POS System using Customer Relationship Management (CRM), loyalty programs, inventory control and more.

POS Software for Any Business, Designed to Scale with You.

Whether you operate a single-location, single-terminal business or a global enterprise requiring integration into an existing complex infrastructure, eOctopus is the POS system that can meet your business needs today and scale as you grow. With a significantly lighter hardware footprint than legacy systems, eOctopus POS System reduces upfront purchase and replacement costs, while our hybrid architecture leverages the cloud to lower maintenance costs and increase efficiency.
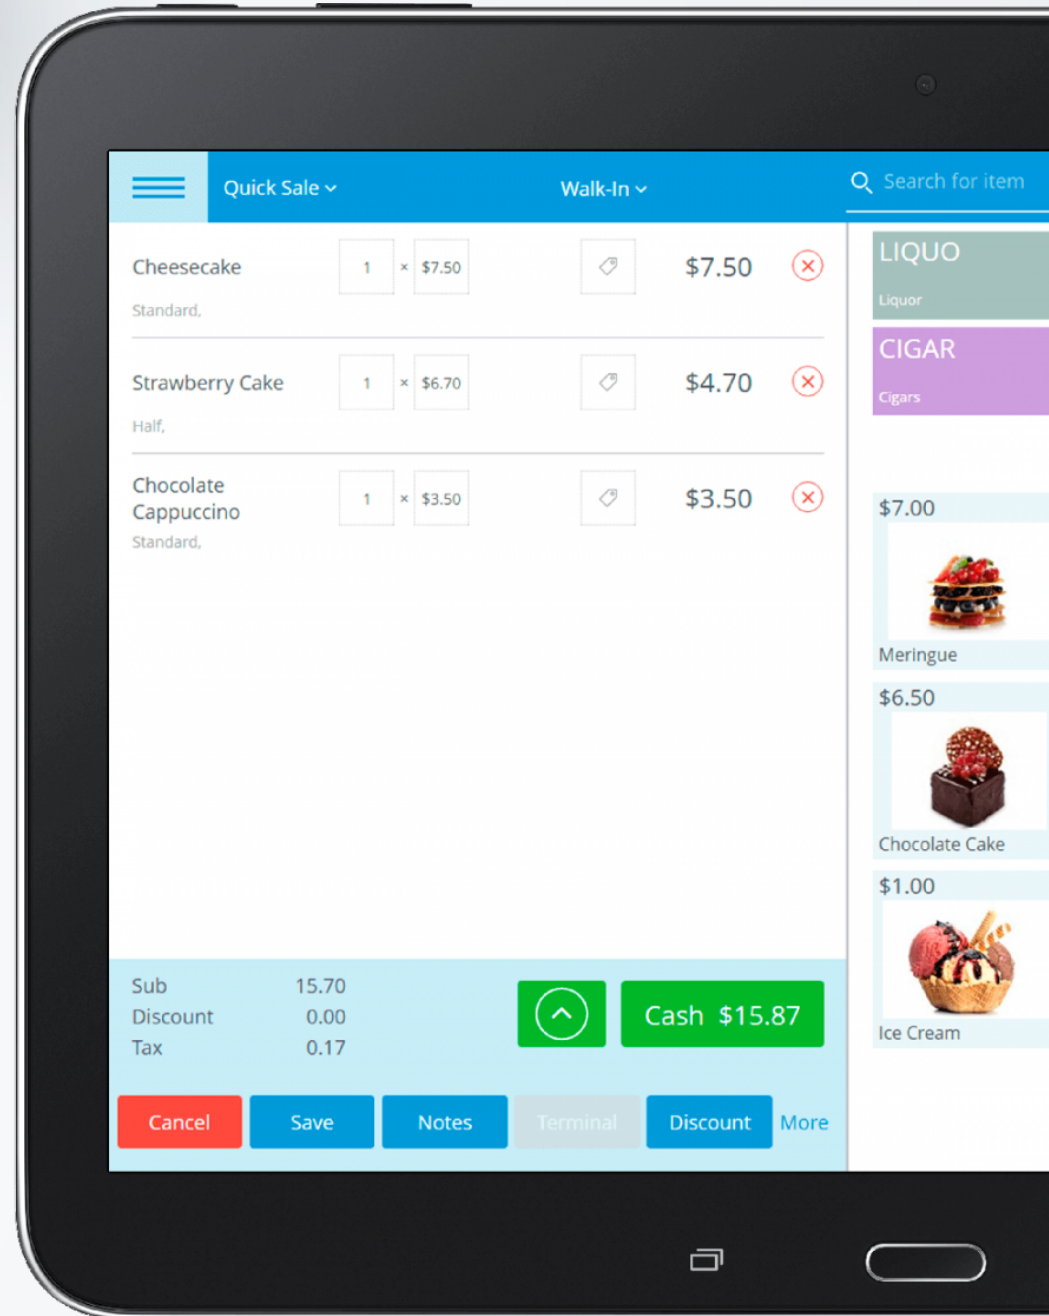

Retail Management Module

The Retail Management/Point of Sale module brings a new level of automation to the retail sales process. It acts as a counter sales system and is dependent on the receivables module to function and can also interact with the inventory management and CRM modules to give businesses the power they need to operate more efficiently.

This module prepares taxable and non-taxable invoices for both cash and AR customers. Cash customer information can be transferred to the Customer Information module to allow you to gather data for future marketing campaigns. As invoices are entered, the system automatically calculates applicable taxes and discounts.

The retail management module provides the ability to generate estimates or put an invoice on hold to be retrieved later for final processing. Picking tickets and receipts may be printed in either a 40 or 80 column format. This module also has an option to allow viewing item detail such as discounts, references, warehouse quantities and serial data. Preset items can be established and used to represent non-inventory items such as delivery or set up fees or presets can be a shorthand way of retrieving inventory items. Kits may be built on the fly for items that are priced as a package deal and it is easy to control what detail prints on the invoice for a given kit.

Key Features

- MULTIPLE STORES (UP TO 50)
